

Below is my endorsement of your firm and the services it provides.

I normally can dial back and shorten what I write because I publish.

But the services your firm provides have been outstanding; so I could not be my usual succinct self.

My reflections on Anick & Associates:

- BizStarts historically engaged an independent individual accountant to provide accounting services and tax work.
- Because our organization relies on government and foundation grants the accounting can be very burdensome for an individual sole practitioner.
- Also, as president I've been concerned about the integrity of cash management and the security of cash flow and the checks we wrote.
- Retaining Anick & Associates proved to be an answer to all our problems in the world of accounting.
- They brought a professional approach and delivered information on a timely basis.
- Their reports have been reliable and easy to understand.
- The Board of Directors of BizStarts is been extremely pleased that no cash goes through our offices and all checks are paid through Anick.
- I sleep better at night.
- In addition they are proactive about giving advice about the complexities of the accounting world and tax issues.
- Finally the charges for their first-class service are incredibly reasonable.
- Our accounting expenses actually ended up being lower.
